

EHS Tracker

Power By **Assertion IQ**

Platform for Environmental Management, Occupational Health, and Safety

MICROSOFT AZURE SOLUTION PROVIDER PROFILE: ASSERTION IQ

Assertion IQ develops solutions for highly regulated industries. EHS Tracker, a Microsoft Azure cloud solution, enables global management of compliance with environmental, health, and occupational safety requirements. EHS Tracker is a specialized web-based application that incorporates best practices from ISO-9001, ISO-14001, and ISO-45001 standards.

INTEGRATED MANAGEMENT SYSTEM

ISO-14001 EMS

A comprehensive Environmental Management System (EMS) module to manage all regulatory compliance data collection and analysis, automate threshold parameters, and track permits. Facilitate regulatory compliance at all times!

ISO-45001

A comprehensive Safety Management System (SMS) module for the daily application of best practices in worker health and safety management, incident management, risk identification, assessment, and mitigation, field inspections, and audits.

ISO-9001 QMS

Integration of best practices in quality management, such as tracking corrective and preventive actions; management of non-conformities and audit results. It also allows you to automatically track indicators, perform statistical analysis, and receive notifications of dates and events.

CLOUD SOLUTION

A web application available in the Microsoft Azure solutions catalog. Cloud platform, scalable, multi-language. Available in single-tenant or multi-tenant mode, including customization options and optimized for mobile devices.

CUSTOMER TESTIMONIAL

FIND OUT WHAT OUR CUSTOMERS SAY - THE CASE OF E-CYCLING

“The tool facilitates the work of the quality control manager, the environmental manager, and the occupational safety manager.”

– José Rivera, EHS Manager, E-Cycling.

FIND OUT WHAT OUR CUSTOMERS SAY

1. “I am proud to mention that EHS Tracker was instrumental in efficiently implementing and maintaining four management systems: ISO 14001, ISO 45001, ISO 9001, and R2.”
2. “Not only did it save us time and money, but it also saved the auditors time and money. Keeping everything organized on a single platform means that half the battle is already won. In addition, as a tool that goes beyond auditing, I can have screens where I can see the training my employees have taken and what they still need to take, the permits I need to renew, and the inspections.”
3. “One of the benefits of working with Assertion IQ is that they know the industry, they understand what EHS is, they understand what health and safety inspectors face in the field. They are people who know the challenges we face.”
4. “Well, I would say 10. If it's from 1 to 10, definitely a 10. In my case, my personal experience is key. I managed to implement a management system that I might not have been able to sustain otherwise.”

“Eng. José Rivera, EHS Manager, E-Cycling International.”
