

EHS Tracker

Power By **Assertion IQ**

Platform for Environmental Management, Occupational Health, and Safety

MICROSOFT AZURE SOLUTION PROVIDER PROFILE: ASSERTION IQ

Assertion IQ develops solutions for highly regulated industries. EHS Tracker, a Microsoft Azure cloud solution, enables global management of compliance with environmental, health, and occupational safety requirements. EHS Tracker is a specialized web-based application that incorporates best practices from ISO-9001, ISO-14001, and ISO-45001 standards.

INTEGRATED MANAGEMENT SYSTEM

ISO-14001 EMS

A comprehensive Environmental Management System (EMS) module to manage all regulatory compliance data collection and analysis, automate threshold parameters, and track permits. Facilitate regulatory compliance at all times!

ISO-45001

A comprehensive Safety Management System (SMS) module for the daily application of best practices in worker health and safety management, incident management, risk identification, assessment, and mitigation, field inspections, and audits.

ISO-9001 QMS

Integration of best practices in quality management, such as tracking corrective and preventive actions; management of non-conformities and audit results. It also allows you to automatically track indicators, perform statistical analysis, and receive notifications of dates and events.

CLOUD SOLUTION

A web application available in the Microsoft Azure solutions catalog. Cloud platform, scalable, multi-language. Available in single-tenant or multi-tenant mode, including customization options and optimized for mobile devices.

CUSTOMER TESTIMONIAL

FIND OUT WHAT OUR CUSTOMERS SAY - THE CASE OF SARTORIUS

“It is so good and provides so many benefits that I was moved to try to integrate it throughout the entire facility.”

– Agustín O’Neill, EHS Manager, Sartorius

FIND OUT WHAT OUR CUSTOMERS SAY

1. “EHS Tracker enabled us to meet all of the company's needs in the EHS department. With this system, we can monitor all safety elements focused on both ISO 14001 and ISO 45001.”
2. “That's right. All data and information management elements are located on a single platform. For example, we recently had an ISO 14001 certification audit, where the entire audit was based on searching for information within the management system. Everything we needed was in EHS Tracker.”
3. “Very diligent. This platform can be customized according to your needs, thanks in large part to its technical team. The technical team's availability has been excellent; they are always available, and we have been able to adjust and modify everything according to our needs.”
4. “The system is high quality. If I could make one recommendation, it would be the ability to integrate training and coaching within the software itself. That way, we could manage everything related to control from the perspective of sustainability and safety requirements.”

“Agustín O´Neill, EHS Manager, Sartorius.”
